Quality

from generation to generation

Whether your customers are professionals or do-it-yourself enthusiasts, your sole care is to deliver quality. That certainly goes for the tools they are working with. Because quality makes them work in a more pleasant and more efficient way. For over 150 years, Polet has been developing tools for the professional market as well as for the do-it-yourself sector. Over the years, advanced specialization and innovation have been the basic philosophy of Polet. This results in some very complete product ranges supported by highly effective commercial and logistics staff.

BELGIAN MADE TOOLS WITH EUROPEAN DIMENSIONS

Polet is a Belgian company and has been exporting its quality products to many countries since decades. It is therefore not astounding that foreign gardening professionals and enthusiasts regard Polet as their partner for heavy work.

COMPLETE PRODUCT RANGES FOR GUARANTEED COMMERCIAL SUCCESS

Not everyone will use a tool in the same way or is willing to invest the same amount of money. This is why Polet has adapted its complete range to the real market needs. The Polet tools are distributed essentially by specialized construction material outlets and garden centers. These receive a large commercial and logistic support.

FROM MODEST SMITHY TO AN INDUSTRIAL COMPANY

More than 150 years ago, Polet forged his first shovel blades. The modest smithy has grown to become an industrial company, in which quality and innovation are both the keys to a commercial and well-balanced enterprise. Polet products are manufactured according to the international quality standards.

They undergo the strictest testing before and after production. The innovative manufacturing process provides a higher yield, which leads in turn to competitive prices on an international level. At Polet, product development is not a vain word. It means a permanent research for customer benefits. The revolutionary glass fiber handles for example have a ten times longer life span than the traditional handles. All sectors are using Polet: the "green" gardening world as well as construction and industrial companies.

The quality of Polet leads to increased efficiency everywhere. Professionals and do-it-yourself enthusiasts highly appreciate this.

Polet forges their first spade blades

2013

Polet takes over traditional Smederij Denolf

Polet Quality Products, Flemish market leaders in garden tools, take an important step towards sharing a location with sister company **De Pypere** by moving their manufacturing, warehouse and offices from Borsbeke to Ardooeie.

The Icarus Invest group has been involved in the garden and construction tool market since 1999, when they acquired garden tool manufacturing firm **De Pypere** from Ardooeie. In **2015** the same holding company also acquired Polet. With this takeover, both companies clearly demonstrated their ambition to continue manufacturing products of high quality in Belgium.

2015

*Acquisition
by Icarus Invest*

Through the years, we have built up a powerful, professional sales team and an efficient warehouse with an excellent service level. This also makes us an ideal partner for various strong brands, for whom we act as distributors.

ROSTAING

**POWER
SAC**

2020

*Polet takes over
DAFCO*

2023

*Polet takes over
Idées B Création
and the Power Sac
brand*

2022

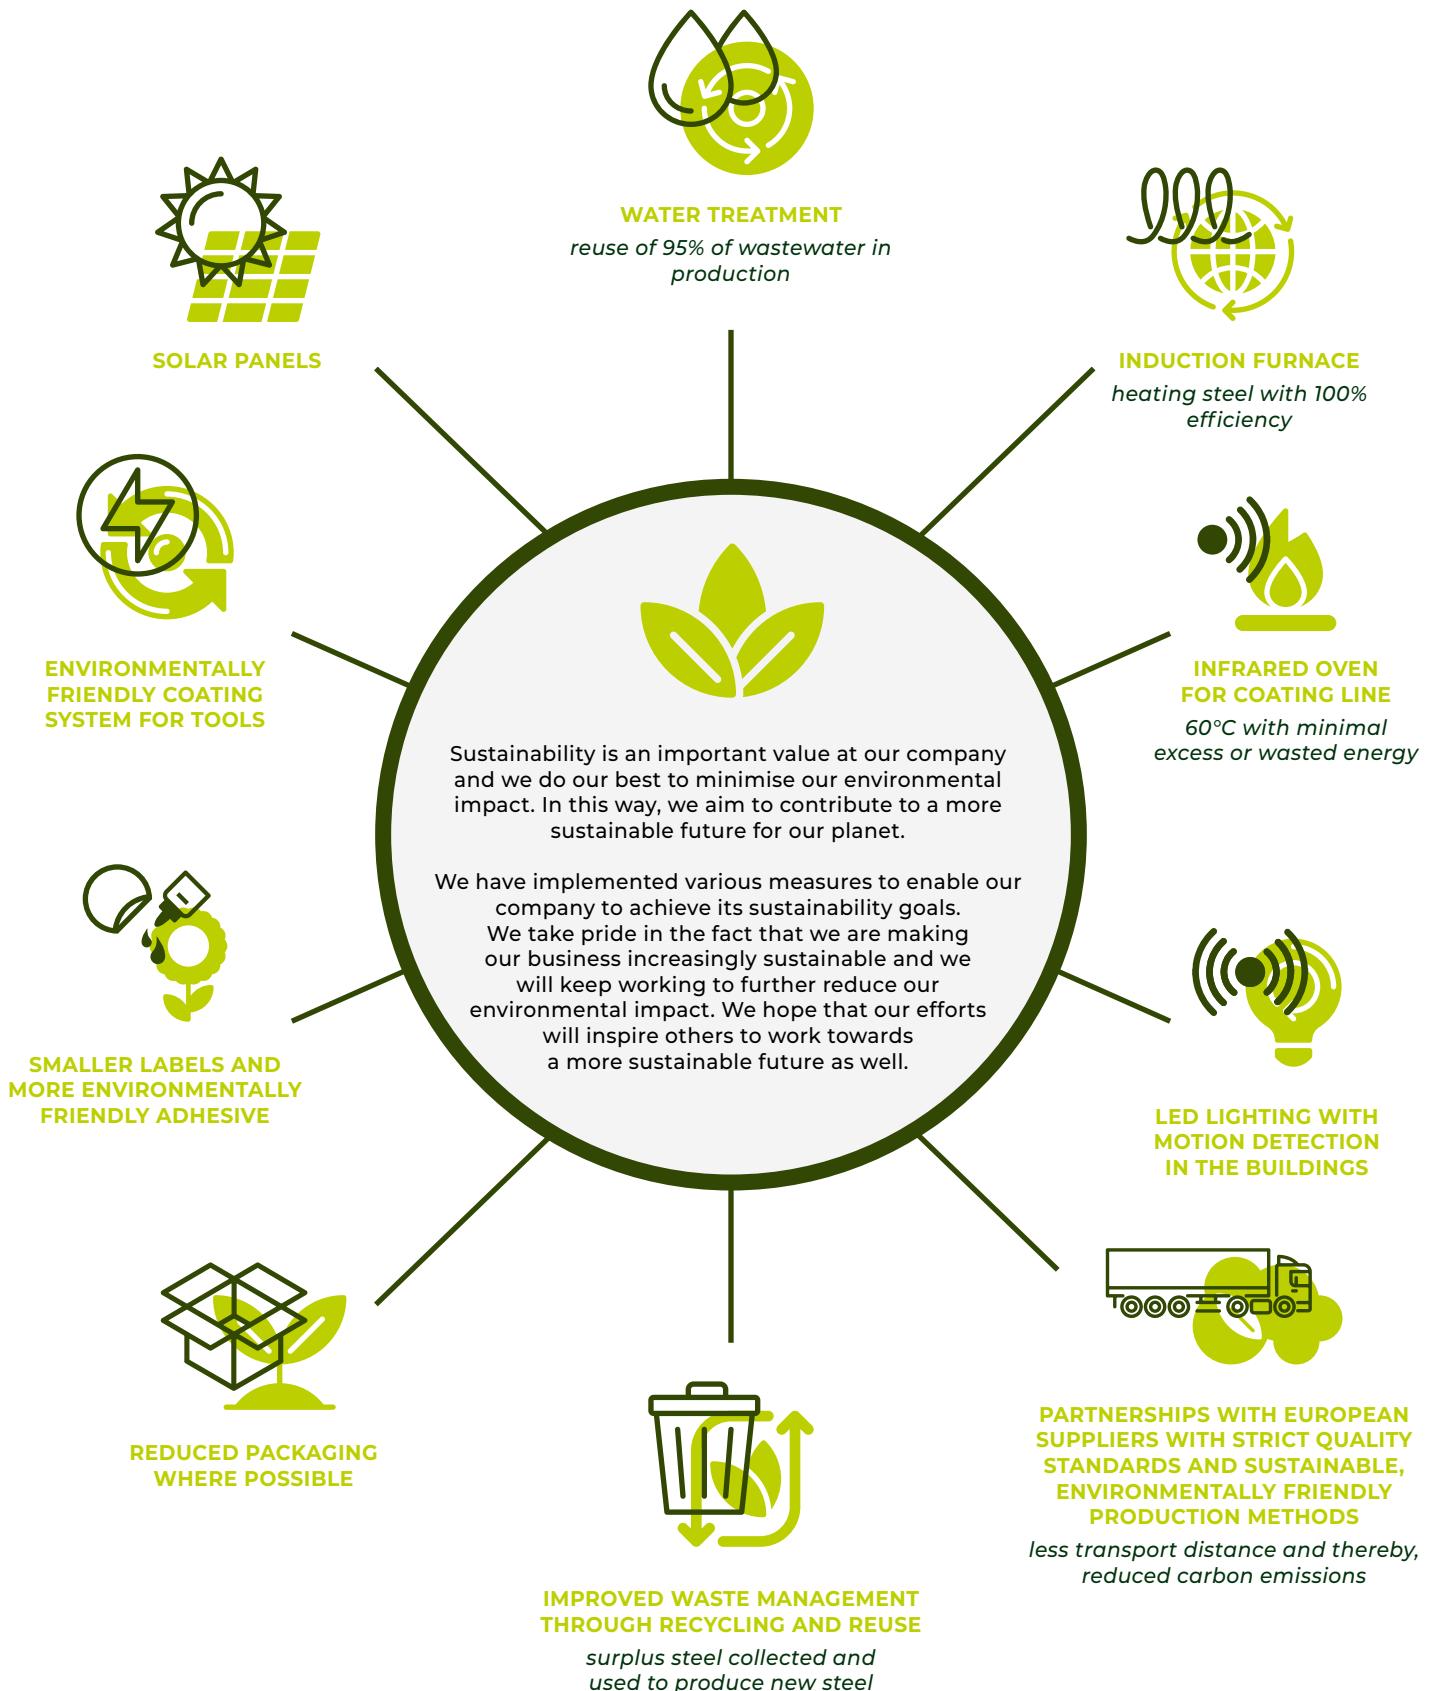

Move to Ardooeie

Together, these factors made the move to a shared site an inevitability. We chose Ardooeie, where **De Pypere** is already located, as is **Metafox**, another group company.

Our two brands' manufacturing processes have now been combined. The new warehouse and offices are already in use and there will be a nice new showroom as well. By combining our knowledge and resources, both brands' manufacturing and distribution processes will benefit and we can ensure a prosperous future on Belgian soil.

WARRANTY

All Polet tools are guaranteed against manufacturing defects, in normal use for which they are intended. Notwithstanding that the quality of the products is closely monitored, there can be an exceptional problem.

A FEW EXAMPLES OF WARRANTY:

- a piece of the steel part of the tool breaks
- the socket of a spade tears or the rivet comes loose
- the handle breaks across (bad wood)
- loosening of a glued fiberglass handle

WHAT IS NOT COVERED UNDER WARRANTY:

- tools that have clearly been used extensively for a long time
- bent tools
- sledgehammers and splitting mauls where the handle has obvious traces of miss hitting
- clear misuse of the tool: a spade may not be used as a lever, a bent spade or a handle that bursts in the longitudinal direction is a clear proof of misuse.

There are fixed standards and descriptions for the settlement of the warranty. These can be found on our website at <https://www.polet.be/en/customer-service/guarantee>. In the case of a private or professional end user (B2C), always return to the point of sale where the tool was purchased. In the case of a reseller (B2B), always return to the factory - contact your representative or the back office at info@polet.be for appropriate handling. Only then can we decide whether you are entitled to a replacement or credit.

RETURN REGULATION

Tools that must be returned in case of warranty or as an error in the order or delivery must be accompanied by a return slip. Badly damaged returned goods can only be partially compensated. Always contact your representative first to discuss the return arrangement. If you are an end user, we recommend that you always contact your point of sale first.

USE

Digging, planting and earthworks

Uprooting trees, shrubs and plants

Removal of weeds

Removal and planting of potatoes

Cleaning up and collecting (garden) waste

Lawn

Forestry work

Clearing the border
Pruning of flowers and branches

Biofriendly alternative

Picking fruit and vegetables

Soil with rocks

Construction

Feeding and removing manure from
horses, cattle and poultry

Fencing

Hay, straw and grain

Aquaculture concepts

Shovel, scoop (wood) pellets

Bamboo

CHARACTERISTICS

 SOFT GRIP	Soft grip	 LOW VIBE	Low vibe hammer concept
 GOOD GRIP	With coating = strong and flexible grip		Right angle shovel
 Kg	Can carry a significant weight		Spade with footrest (step)
 STRONG	Strong, robust and durable		Iron thickness spade blade, expressed in millimetres
 ERGO	Ergonomically		Diameter handle, expressed in millimetre with specification knob handle, T-handle or D-handle
 LEFT	Suitable for left-handed people		Hardness of Steel, expressed in Rockwell hardness (HR) 50 + on the Hardness Rockwell C Scale
 LIGHT	Super light		Full wheels = no risk of punctures
 FLEX	Flexible handle		Open / locked
 SHARP	Sharpened		Anti-twist
 SELF SHARPENING	Self-sharpening		Anti theft
 WATERPROOF	Water resistant, does not absorb water Waterproof or suitable for wet work		Aquality, universal compatible with other brands
 FROST SNOW	Frost and snow resistant		Aquality, anti algae
 ALL SEASON	Suitable for all seasons		Aquality, aqua stop

MATERIAL

 ALU	Aluminium Light and durable	 RVS	Stainless metal
 FIBER 3001	Lightweight, hollow polyamide handle reinforced with fiberglass 3x stronger than a wooden handle	 INOX	Stainless steel
 FIBER 5001	Handle with glass fibre core surrounded by PVC 5x stronger than a wooden handle	 ASH HANDLE	Ashwood handle
 FIBER 9001	Handle with full glass fibre core 10x stronger than a wooden handle	 BRASS CONNECTOR	Brass coupling/connector
 CARBON	Carbon fibre handle		
 CARBON STEEL	Carbon steel		
 FULL METAL	Full metal		

GAS BURNERS

 GAS BURNER	Gas burner as alternative weed control	 PIEZO	Piezo ignition
 TEMPERATURE	Up to 1750 °C

The whole range of garden tools from Polet Traditional is made from high-grade steel. Each tool is forged and hardened in our own production according to craftsmanship with Belgian know-how.

Before they end up in the shop, the tools are sharpened individually so that there is always an extremely sharp cut to the garden tools.

**ARTISAN PROCESS**

Due to the traditional process of forging, the spades are suitable for the toughest tasks, both cable work and the transplanting of trees and shrubs.

SKILLS AND CRAFTSMANSHIP GIVE NEW LIFE TO OLD TOOLS AT POLET

Polet is a Belgian tool manufacturer with a passion for craftsmanship. Polet designs quality bespoke tools based on deep-rooted knowledge and expertise. In this way, the company supports professional workers' performance of manual tasks for a range of industries. Where other tool manufacturers have opted for mass production only, Polet takes a different approach. Much of its production process is carried out by hand, making every tool a unique object. This remarkable company even makes tools that are specific to a certain region and have become otherwise impossible to find.

Thierry Vanwinkel is a sales representative for Polet in France and is happy to go into more detail about the company's deeply rooted, Belgian expertise.

TAILORMADE

CUSTOM TOOLS

The production of the Polet Traditional series is done in a different way than in the case of mass production. Each tool is forged by hand, so there are no two identical spades, shovels or hoes.

In addition to the authenticity and optimal quality, customers can therefore also request personalized tools. For example, an extra sharp edge or a different shape can be obtained in consultation with the company.

MADE IN BELGIUM

HANDLE

ergonomic: the back stays straight thanks to the long handle with hilt.

Hickory Wood

STEEL

- Hickory wood (kind of walnut) is particularly strong and resilient
- suitable for heavier work
- Hickory wood comes from Carya, a member of the North American walnut family, related to our Walnut.

BLADE

CARBON STEEL

- high quality forged carbon steel
- extra hardened
- abrasion resistant & durable
- good sharp & self-sharpening by the gradually thinning blade

10 YEAR GUARANTEE

- durable spade blade
 - hardened Polet steel
 - self-sharpening
 - sharp cutting edge
 - robust handle
 - guarantee: on spade blade, under normal use
- Info Guarantie: www.polet.be

SPRING SPADE

BLADE

- blade thickness 3 – 3,5mm
- high quality steel hardened up to 47 - 50 HRC*
- hardened to the opening of the socket
- smoothly polished for a minimal frictional resistance
- all processing takes place in a heated state to remove all possible stresses originating in the metal

HANDLE

- handle of superior quality ash
- straight-grained
- polished smooth and then varnished or waxed
- recessed pin, riveted and glued.

HANDLE DIAMETER

- Ø 41 mm

SQUARE FOOTSTEPS

- welded square
- 15/15mm

ROUNDED FOOTSTEPS

- 10mm

FOOTSTEP FOLDED

CUTTING EDGE

- finely sharpened
- correctly hardened to guarantee a self-grinding property

2ST T-HA 110CM**

Art. No. 112342V | Pack.: 5 | Handle: 1911002

The flat rim shovel that is mainly used in the Netherlands. It has a smaller work surface than a regular sand shovel. The worktop is also slightly curved so that the soil remains on it easily.

Epoxy black

DISCOVER OUR RANGE POLET CLICK-PRO

The Polet Click-PRO concept combines **the quality of Polet Traditional hand-forged tools** with the **ease of use of a click system**.

These innovative tools are handmade right here in our production facility in Ardoorie. A nice **Made in Belgium** story, in other words. Our range of click tools offers a **solution for every challenge in the garden**. And includes hoes, hoes, cultivators, lawn edge and weed whacker, joint scrapers, leaf rakes and brooms. With **1 handle, you can combine many tools**. This **saves a lot of space** in your garage, shed or garden house.

The tools easily click in or out of the handle thanks to the handy slider. But they remain firmly in place during use. To click the tool into the handle, slide the knob backwards, push the tool into the handle to the end and then let the knob slide back forwards.

We have a **number of handle types available in different lengths**. So you always have the right handle to match the tool, as well as the **right length** to work ergonomically.

The concept has its **own logo and packaging style**. This attracts attention on the shop shelves and informs the customer at the same time. You can easily find Click-PRO products in the catalogue via the logo.

BROADFORKS

BROADFORKS

- popular with the ecological gardener
- it aerates the soil without disturbing the underground microbiological balance
- ergonomic
- easy
- efficient
- it does not change the soil structure
- does not damage the roots
- it makes the soil loose and airy

HOW DOES A BROADFORK WORK?

- 1) Insert the broadfork's teeth into the ground and push them deeper with your foot.
- 2) Move one step backwards and pull the arm or tube towards you until it is in an angle of 60 to 45 degrees.
- 3) If necessary, move the broadfork from left to right. This is not necessary with the double broadfork.
- 4) Move 1 step backwards again and now also pull the broadfork backwards and repeat from step 1.

DOUBLE BROADFORK

- for ecological gardening: aerate the soil without disturbing the underground microbiological balance
- with 2 rows of teeth, 9 in total, to ventilate the ground without turning

GARDEN CLAW

- vegetable garden & ornamental garden
- loosen soil
- aerate soil
- weeding
- less strain on the back

PUSH-PULL HOE WITH HILT HANDLE

While Belgians like to tackle weeds in the garden with a draw hoe, the Dutch have always preferred a push-pull hoe. A hoe allows you to weed with a push-pull motion, which has several benefits.

A number of male and female Flemish organic farmers have extensively tested this push-pull hoe.

They used it for weeding, to bring up weeds from the subsoil, to prepare the soil and hoeing in between herbs. They share their experiences below:

**“****KAREL**

It took some getting used to, but after a while, it feels completely natural to use. The push-pull hoe is very comfortable to hold and I feel that it makes removing weeds easier. I also feel that I have to make less of an effort, even in rocky or hard subsoil. I would never trade in my push-pull hoe again for a draw hoe.

TANJA**“**

Unlike when I use a draw hoe, my arms and back don't hurt when I use the push-pull hoe. The longer handle means I have to make less of an effort. You can even use it with just one hand! Very user-friendly and ergonomic.

**“****WILLEM**

The main thing that I like about this push-pull hoe is that it doesn't break up the soil too much. You can also use it to easily remove excess grass and weeds. But this push-pull hoe works equally well for cabbages and other larger crops. A draw hoe digs deeper and requires you to pull, whereas this hoe lets you push and pull. I also like the handle and the longer pole.

ALTERNATIVE WEED CONTROL

Weedrollers

**WEEDROLLER 17CM
+ 2 CROPPROTECTORS**
Art. No. 075150 | Pack.:1

5 410685 885819

Polet has plenty of tools that help us to tackle weeds in an alternative way. For large surfaces we can use the "Weedroller" and "Wheel hoe".

WEEDROLLER 35CM

Art. No. 075200 | Pack.:1

5 410685 885826

WEEDROLLER

- **3-in-1:** hoeing, aerating and weeding in one operation between plants, rows of vegetables, on unpaved surfaces
- **ecological:** by regularly weeding weeds have no chance to multiply
- **ergonomic:** thanks to the wide grip and the adjustable handle you can work nicely upright
- **durable & long-lasting:** it is made from a 2 mm thick, galvanized and painted metal plate, and a 2 mm (thickness) steel cutting blade

- 17cm
- 2 crop protectors:
does not damage surrounding crops

- 35 cm
- adjustable in length

Wheel hoe**WHEEL HOE
WITH HOE 25CM**

Art. No. 074100 | Pack.: 1

5 410685 879184

ECONOMICAL/ECOLOGICAL

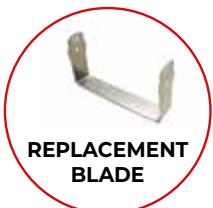

You no longer need chemical products and you do not consume any fuel. In the longer term this is a profitable investment.

**WHEEL HOE**

- easy weeding on large surfaces and different types of soil
- standard hoe 25 cm included, also available with 35 cm and 50 cm hoe
- efficient
- ergonomic
- modular with different accessories
- ecological

**HOE**

- widths: 25, 35 and 50 cm
- blade is replaceable

**REPLACEMENT BLADE KARTELY
220MM**

Art. No. 124220 | Pack.: 1

**KARTELY**

- ideal for removing germinating weeds
- weeding by both pulling and pushing
- replaceable blade
- always sharp thanks to jagged structure
- goes smoothly to the corners thanks to its shape

**U-MULTI-HOE**

- stainless Steel
- multitool: weeding by both pulling and pushing, making seed grooves
- both pulling and pushing works
- easily remove thistles and dandelions with a lever movement thanks to the cut-out shape

WEED BURNERS

- easy weed control in an environmentally friendly and non-toxic way
- apply on terrace, driveway or paths
- suitable for all weather conditions
- piezo igniter

TIP USE

- keep the burner on the weeds for a few seconds
- no need to burn weeds black
- by thermal shock the cells of the weeds burst open and weeds are destroyed
- after a number of treatments, the roots of the weeds will be affected and die off

SMALL SURFACES

- fight weeds environmentally friendly by burning them
- gas cartridge sold separately

ALWAYS USE THE WEED BURNERS CORRECTLY!

Scan the QR code for more information about how to use it

LARGE SURFACES

Art. No. 500207 and Art. No. 500210

- works with regular gas cylinders
- caution: always use with safety valve!
- no gas release required

Art. No. 500401

Art. No. 500402

TROLLEY FOR GAS BOTTLE

- thick and heavy steel floor plate and frame
- load capacity: up to 33kg
- potmover
- provision for gas burner
- sturdy full wheels, Ø 24cm
- stable on any surface
- dismantlable

100 kg

SEED ROW PULLER 5 TEETH ADJUSTABLE

Art. No. 380105 | Pack.: 1

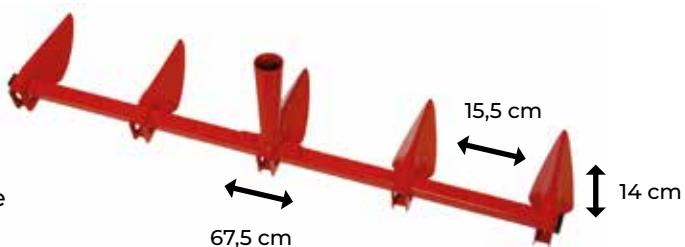

**SEED ROW PULLER 5 TEETH ADJUSTABLE
W/HA 150CM**

Art. No. 3801051 | Pack.: 1 | Handle: 143662

SEED ROW PULLER

- fast and efficient
- adjustable teeth: row distance of your choice
- up to 5 sowing/planting rows in one move
- max. 67 cm wide

Manual seed row puller for pulling seed or planting rows in the vegetable garden. With 5 adjustable teeth and ash handle. Efficiently draw 2/3/5 seed rows side by side, in parallel straight rows, in one movement and with the same intermediate position.

Because the rows are at an equal distance from each other, there is more space between the plants, which promotes growth and facilitates weeding and harvesting. When seeding on rows (or lines), one can also save on seed. Ideal for vegetables such as peas, onions, beans, beetroot, carrots,...

GARDEN ROLLER 52CM Ø33CM

Art. No. 070707 | Pack.: 1

GARDEN ROLLER

- crumble the remaining clods after tillage
- after rolling, unevenness becomes visible for easy levelling
- presses the soil evenly and gives rain no chance of subsidence
- pressed soil promotes rising groundwater, so that newly sprouted seeds are protected against dehydration
- use the roller to break open the upper layer crust for the newly sprouted seed

FILLABLE WITH WATER OR SAND

- Water = ideal for light soil
e.g. sandy soil
- Sand = ideal for heavier soil
e.g. clay or clay soil

3 PIECES**

Art. No. 38251 | Pack.:1

5 410685 891698

**SNAIL RING**

- set of 3 solid copper snail rings to keep snails out of the ornamental and kitchen garden.
- a safe and natural barrier against snails. Snails dislike copper and will therefore not crawl on the rings.
- available in 3 different diameters: 15, 20 or 25 cm.
- to protect a larger area, you can also link the rings together.
- durable metal and reusable.
- make sure that no leaves hang over the ring.

SMOOTH SURFACE

NEW DESIGN

NEW METAL HANDLE HOLDER COCONUT

- sweeps well and is cheaper
- use in dry places: sheds, barns, garages, indoor use
- 28mm Ø instead of 24mm Ø

NEW DESIGN

NEW METAL HANDLE HOLDER ARENGA / ELASTON

- more resistant to water than coconut
- ideal for terraces and indoor use
- does not stick together
- 28mm Ø instead of 24mm Ø

UNEVEN SURFACE

PVC

- water-resistant
- suitable for scrubbing
- long PVC: suitable for handling larger quantities

BASSINE

- use in dry areas: sheds, barns, garages, indoor use
- natural fibres of good quality

75% BAHIA

- natural fibers of excellent quality
- resistant to water
- does not rot or mold

BAHIA WITH PVC

- water-resistant
- raises less dust than PVC
- ideal for construction sites and agriculture

SHERBRO WITH BALEENS

- stiff and strong fibres, do not deform due to moisture
- ideal for construction sites and agriculture
- suitable for rough work and scraping off dirt

PVC WITH STEEL WIRE

- water-resistant
- ideal for construction sites
- robust steel handle holder

CROSSED PVC

- water-resistant
- suitable for scrubbing
- raises less dust through the crossed PVC hairs
- robust steel handle holder

GARDEN TERRACE BROOM PVC

- suitable for use in the garden and around the house
- water-resistant
- suitable for scrubbing

BULLDOZER BROOM PVC HAIRS

- suitable for indoor use
- thanks to the special shape, the dirt stays better in front of the broom

STREET BROOM SYNTHETIC

- water-resistant
- suitable for scrubbing and cleaning up bulky waste

SHERBRO MUNICIPAL BROOM

- stiff and strong fibers, do not deform due to moisture
- ideal for construction sites and agriculture
- suitable for rough work and scraping off dirt

WITCH BROOM BOUND NATURAL FIBER

- suitable for optimum sweeping results on uneven surfaces

Stable broom/rake and trailer sweeper

BROOMRAKER STABLE BROOM/RAKE AND TRAILER SWEOPER 350MM M/ST 150CM

Art. No. 409050 | Pack.: 1

- cleaning rubber mats and floor of horse trailers
- a unique combination sweeper/rake
- with the brush everything is neatly swept away
- a strong all-round tool

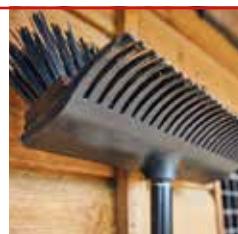

2 IN 1

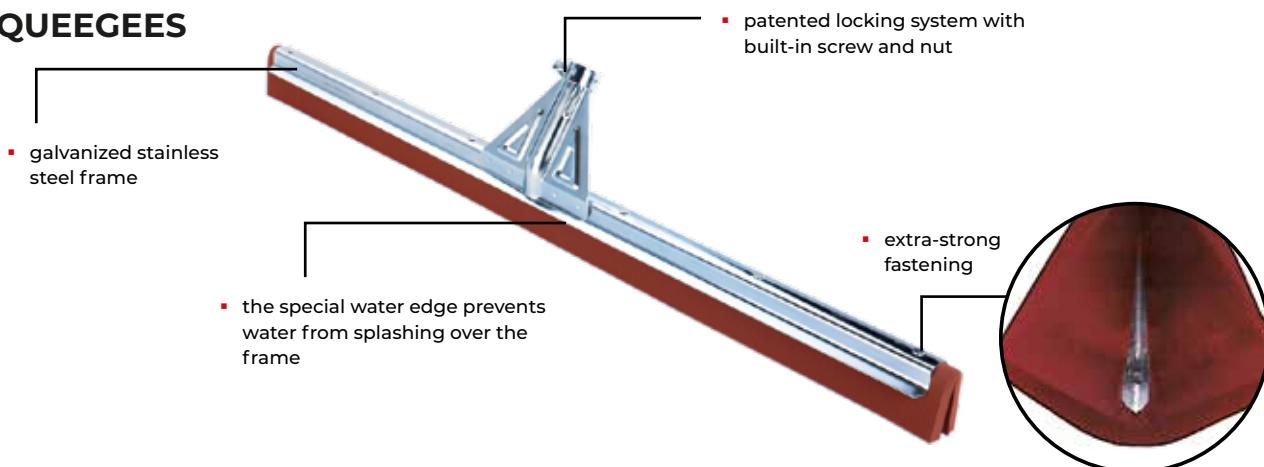

EXTRA STRONG
ALUMINIUM

UNIQUE COMBINATION
SWEOPER/RAKE

SQUEEGEES

- **NATURAL RUBBER:** gives strength to the squeegee and prevents bacteria from forming in it
- **WEAR RESISTANT:** lasts longer
- **STRONG & FLEXIBLE:** high resistance to tearing and friction
- **HIGH ELASTICITY:** the rubber goes deep into uneven surfaces and resumes its shape after use
- **PERFECT DENSITY** and water resistant
- **FOR USE ON VARIOUS SURFACES:** smooth and uneven surfaces such as concrete, stone, tile and marble
- **DOUBLE RUBBER BOARD:** double efficient, double result

INDUSTRIAL SQUEEGEE

- special water edge
- contains neoprene to resist oil, acids, fats and detergents
- use in industry, garages and maintenance facilities
- reinforced dul

HYGIENE FLOOR WIPER

- special water edge
- use when hygiene is important
- due to its white colour, it is clearly visible when the floor mop has been properly cleaned or needs to be replaced
- use in swimming pools, kitchens, bathrooms, restaurants and saunas

STANDARD FLOOR WIPER

- versatile use when oil and heat resistance are not required
- use in shops, schools, public places, terraces, cellars, driveways

FIBER 5001

FIBER 9001

SPADE HANDLES

- ash: the veins run straight, over the entire length of the handle
- beech wood: recognizable by the dark spots on the wood
- varnished: makes the handle smoother, which gives a more pleasant feeling and stops the moisture from rain or sweat, so that your handle lasts longer
- lengths between 70 and 115 centimetres
- diameter: Ø 36 mm, Ø 37 mm, Ø 38 mm, Ø 41 mm and Ø 44 mm
- handle: T-handle, D-handle or rounded

RAKE AND BROOM HANDLES

- lengths between 120 to 170 centimetres
- diameter: Ø 24 mm or Ø 28 mm
- straight-grained, smoothly sanded wood of A-quality, tropical hardwood or ash wood

**AXES AND HAMMER HANDLES**

- pay attention (always, but certainly with axes and hammers) to the correct diameter and sharpening of the handle
- ash wood and Hickory (even harder than ash, very suitable for the heavier work)

SHOVEL AND FLAT RIM SHOVEL HANDLES

- ash wood: good firmness and a certain flexibility
- beech wood: more susceptible to moisture, with warping result
- curved handle: the shovel is nicely balanced and limits the necessary force when shovelling
- lengths between 95 and 130 centimetres
- diameter: Ø 41 mm

FORK HANDLES

- handle: T-handle, D-handle or rounded
- with or without ferrule
- lengths between 85 and 135 centimetres
- diameter: Ø 36 mm, Ø 39 mm and Ø 41mm

**HAY FORK HANDLES**

- with or without ferrule
- lengths between 135 and 165 centimetres
- diameter: Ø 36 mm

Only the FSC® wood, designated "FSC" in the product description in this catalogue, comes from sustainably managed forests that fall under the FSC® regulations. Polet will never import wood that comes from illegal deforestation from tropical rainforest.

FIBER HANDLES

- fiber 3001: 3x stronger than wood
- fiber 5001: 5x stronger than wood
- fiber 9001: 10x stronger than wood

FIBERGLASS HANDLES

A **fiberglass handle** consists of millions of very fine glass fibers and hardened by means of an epoxy resin in a microwave, to make sure there are no air bubbles between the fibers. This prevents spades from bursting in the longitudinal direction.

**3x
STRONGER
THAN WOOD**

FIBER 3001

**5x
STRONGER
THAN WOOD**

FIBER 5001

**10x
STRONGER
THAN WOOD**

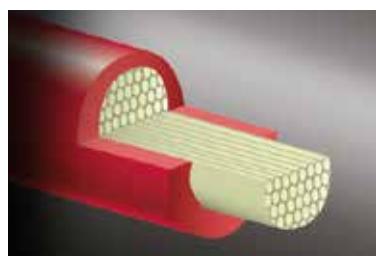

FIBER 9001

HOLLOW FIBER

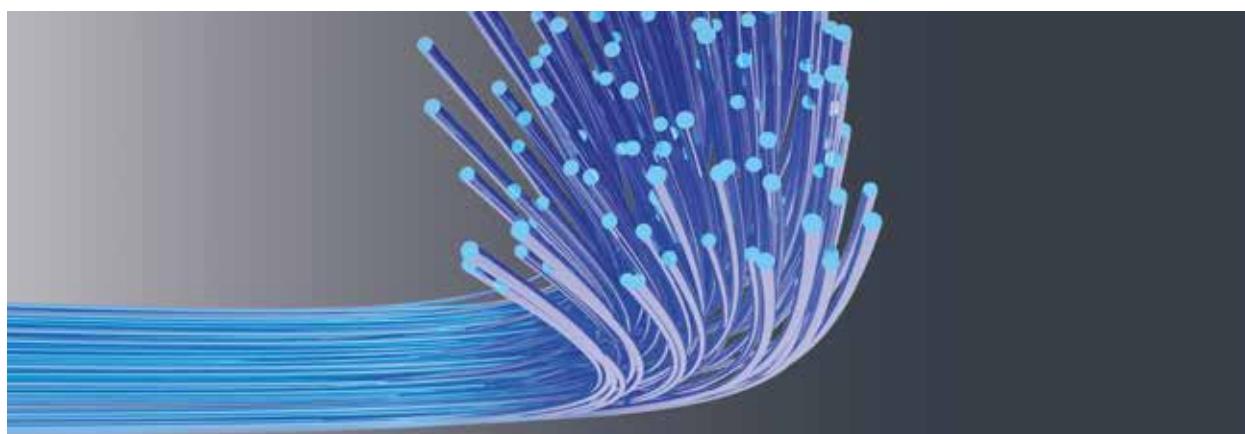

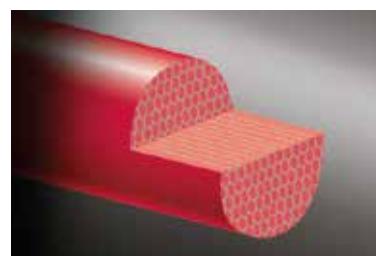

- fiberglass reinforced polyamide handle
- light hollow handle, 2 to 3 times more resistant than a wooden handle
- use: shovels, flat rim shovels and brooms

FIBER CORE

- fiberglass core surrounded by PVC
- use: range of spades, hammers, sledges, splitting mauls and axes

FULL FIBER

- fiberglass, 100 % homogeneous drawn, parallel and continuously
- use: range of professional spades and hammers

MERCHANDISING

Together with our sales team we can work out a presentation for you, adapted to your store. Audio-visual support through a video screen is also possible. We have designed a number of displays with which you can present well-rotating products in a limited space. In addition, there is the possibility of putting together sets for seasonal promotional campaigns. Our sales team is happy to assist you with advice and assistance.

FULL RETAIL CONCEPTS TAILORED TO YOUR NEEDS

GOOD TOOLS NEED MAINTENANCE

MAINTENANCE

Moisture in soil can lead to **rust**. That is why it's vital that you clean your tools with a rag or a steel **brush** after use and store them in a **dry place**. Before winter hits, you should take some time to give your tools some love and care.

Perhaps the edges need sharpening. You can use a soft file or a whetstone for this. An angled grinder with a sanding disc works even better. Make sure not to heat the edge, because this will reduce the steel's hardness. You can grease your tools with **oil**, or spray them with a **silicone spray**.

TIPS

Which tools do we definitely need, what are good tools and what should we pay attention to when purchasing and maintaining them?

A PRACTICAL TIP

Fill a large bucket or container with a **mixture of sand and biodegradable (chain) oil**. After each use, you should dip your tools in it a few times. This cleans the dirt off the tools and greases them.

Don't forget the shaft of your tools. Treat the shaft with some **linseed oil**, rubbed in with a rag, a few times a year. This protects the wood and the shaft will feel softer as a result.

NOTES

NOTES

QUALITY FROM GENERATION TO GENERATION

Polet has been a designer and manufacturer of tools for both the professional and DIY market ever since the company was founded in 1865. Our guiding principle throughout all these years has always been our broad specialisation and thirst for innovation. In addition to this, we are constantly improving and expanding our product lines.

We are thankful for your confidence in us and would like to encourage you to use this catalogue as a powerful source of inspiration for yourself and your customers, and to provide you with the very best tools on the market today.

Our team of expert sales representatives will be happy to provide you with all the information, training and marketing materials you need to ensure your success. Together, we can offer our customers the best possible experience and strengthen their confidence in our products.

We look forward to helping you turn your project into a success and, by doing so, consolidating our position as a market leader and manufacturer of hand-held tools.
